Report on Field Visit to Baansera Park, Sarai Kale Khan

Date: 9 November 2025

Time: 8:00 AM onwards

School Faculty: Dr. Bhawna Bali

As part of the course Understanding the Urban, the students of the first semester of the MA Urban Studies programme took part in field trip to Baansera Park located near Sarai kale Khan. The aim of this field trip was to gain an understanding about green infrastructure intervention in Delhi, which is part of the River Yamuna Riverfront Development Project by the DDA. The students explored the variety of flora, particularly bamboo which has been planted at the site to create a public park, its management through water tanks that have been set-up for the purposes of irrigation and water recharging, and its emergence as a green island amidst the surrounding concrete structures.
