Pre-requisites: SUS1MA505

Aim: This course has been designed keeping in mind the students who have already been exposed to M08. A beginning to theory of integrable functions is made by introducing basics of Riemann Integration. A detailed study of sequences and series of functions along with lots of examples will be done. The various notions learnt till now will be used for functions of two variables.

Brief description of modules/ Main modules:

- 1. Riemann Integration**
- 2. Sequences and Series of functions**
- 3. Functions of two variables**
